

Ideation Phase

Define the Problem Statements

Date	29-06-2026
Project Name	Automated Network Request Management
Team ID	
Maximum Marks	

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1 (Network Operations Optimizations)	An IT Operations Manager overseeing infrastructure and resource allocation	Optimize network engineering team bandwidth and reduce MTTR	Highly skilled engineers are overloaded with repetitive and routine ticketing tasks	There is no automated fulfillment system for standard network changes, so every request needs manual handling	Frustrated about wasted engineering effort and worried about operational delays and scalability issues

PS-2: (Network Security & Compliance Management)	A Cybersecurity Compliance Officer responsible for enterprise risk management.	Ensure every network configurati on change is properly approved, tracked, and document ed	I cannot easily verify whether firewall rules and IP changes followed correct approval workflows	Approval records are scattered across emails, chats, and offline logs instead of a centralized system	Concerned about security risks, audit failures, and compliance penalties
